linkedin/aashishrbhandari

I am a Security Engineer who loves to explore Software, Network & Cloud from different angles (Security, Frontend, Backend, Architecture), I keep on improving my skills by reading, researching and developing (small projects), I try to learn the concepts in a way that I can EXPLAIN it to others, this helps me increase my Knowledge & Expertise on the subject. I always try to learn concepts from different ways so that i can fully decode and relate with it. I am very much curious to learn something new and always try to challenge myself.

→ Work Experience
